Within the framework of implementing the tasks outlined during the meeting chaired by the Head of State on October 21, 2025, dedicated to the accelerated introduction of artificial intelligence technologies into public administration, economic sectors, and regional systems, a seminar-training on artificial intelligence technologies was held at JSC “Uzkimyosanoat” on May 14–15 for department heads and employees.

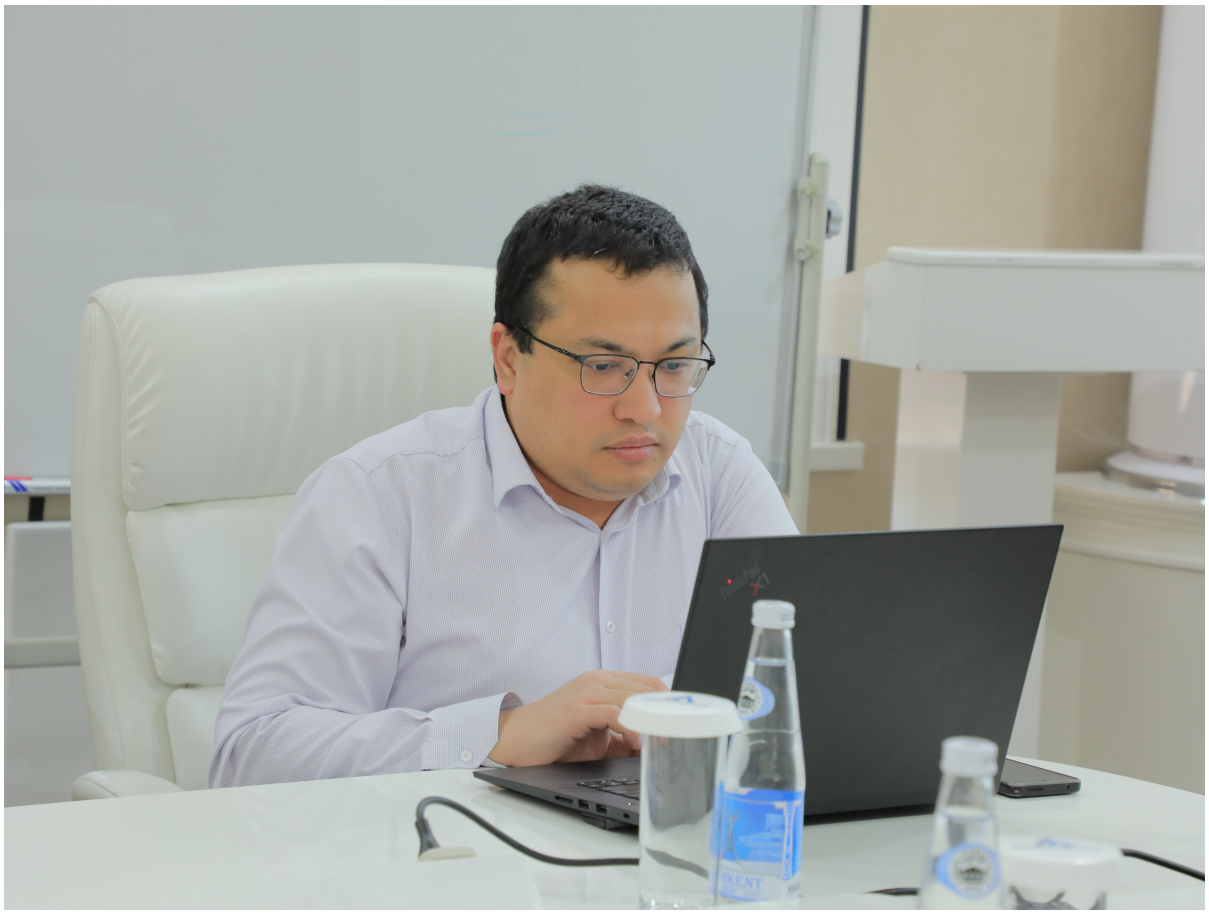

During the seminar, participants were provided with practical and interactive presentations on the effective use of artificial intelligence capabilities.

In particular, the following areas were covered:

- automation of work processes and improvement of personal efficiency;
- digitalization and automation of document management;
- working with accurate statistics and data;
- visualization and analytics;
- application of AI solutions in forecasting and verification processes.

The main objective of the event was to familiarize employees with modern digital technologies, promote the wider implementation of innovative approaches in work processes, and enhance corporate efficiency.

At JSC “Uzkimyosanoat,” artificial intelligence is becoming not a technology of the future, but an essential part of today’s efficient and innovative work processes.
