The republican stage of the **"Most Active Woman Innovator"** competition has started at the branch of the Russian Chemical-Technological University (RCTU) in Tashkent. The event is held annually among female specialists under 50 years old working at enterprises within the JSC "Uzkimyosanoat" network.

The competition aims to support the professional development of women, identify talented inventors and innovators, and foster a healthy competitive environment. This year, 13 innovative projects were submitted, focusing on energy saving, solving environmental issues, optimizing production processes, import substitution, and creating new jobs.

Project evaluations are conducted by representatives of the Committee for Women and Family Affairs and the Agency for Innovative Development, ensuring fairness and transparency.

The working group will thoroughly analyze all submissions and select the winners to be awarded.

Loyihaning maqsadi
UZ-POTASH
Mahsulotni mahalliylashtirish
O'zbekiston sharoitida ilk bor mikroelementlar bilan boyitilgan kaliy xlorid ishlab chiqarish orqali importga qaramlikni kamaytirish, mavjud xomashyo bazasidan samarali foydalanish, mahsulot turini ko'paytirish
Mikroelementlar boyitilgan kaliy xlorid ishlab chiqarish orqali:
Hosildorlikni oshirish
O'simliklar uchun zarur bo'lgan mikroelementlarni (mis, rux, marganets, bor) kompleks shaklda o'g'itga qo'shish orqali agrotexnik samaradorlikni oshirish, shuningdek, o'simlik kasalliklariga chidamliligini kuchaytirish.
